1. INVESTMENT OBJECTIVE AND POLICIES

Investment Objective

The investment objective of the Majedie Asset Management UK Equity Fund is to aim to produce a total return in excess of the FTSE All-Share Index (the **Index**) (as described in Appendix I to this Supplement) over the long term through investment in a diversified portfolio of predominantly UK equities.

Investment Policies

The investment objective of the Fund will be achieved primarily through investment in a diversified portfolio of predominantly UK equities. The Investment Manager will construct the Fund's portfolio taking into consideration macroeconomic factors (such as interest rates, GDP, monetary and fiscal trends), the outlook for different economic sectors and market capitalisations, and stock-specific factors (such as valuation, market position, investment potential, management quality and financial strength). There is no policy to restrict investment to any particular economic sector or industry.

The Fund intends to pursue its investment objective through investment in the equity securities of companies which are listed or traded on one or more Markets listed in Appendix I to the Prospectus. At least 80% of the Fund will be invested in UK equities, with the balance in international equities (which for the avoidance of doubt could include emerging markets equities), cash or near cash.

The Fund may invest up to 10% of its Net Asset Value in other collective investment schemes. For the avoidance of doubt, such other collective investment schemes include money market funds invested in for cash management purposes.

The Fund will continuously invest more than 50% of the value of its (gross) assets in equity securities which constitute "equity participations" within the meaning of section 2, para 8 of the German Investment Tax Act (Investmentsteuergesetz) (or a corresponding provision of any successive legislation).

There can be no guarantee that the investment objective of the Fund will be achieved.

Cash Management

The Fund may hold and invest up to 20% of its Net Asset Value in liquid assets such as cash, bank deposits, money market funds having a minimum credit rating from a recognised rating agency of A1-P1 (or equivalent) and money market instruments including but not limited to short-term fixed income instruments including treasury bills issued or guaranteed by any government which are rated and may offer fixed or variable interest rates.

The situations in which liquid assets set out above may be held may include: (i) where the Investment Manager considers that there are not sufficient suitable investment opportunities; (ii) to protect the value of the Fund and maintain liquidity at times in falling or volatile markets; (iii) to facilitate the Fund's ability to meet redemption requests; and (iv) where the Fund has received subscriptions that are awaiting investment. Subject to the ongoing need to provide adequate liquidity to meet the foreseeable level of redemptions at all times, there is no minimum level of liquidity that the Fund may hold at any one time.

Use of Financial Derivative Instruments (FDIs)

The Fund may not invest in FDIs.

Securities Lending and Repurchase/Reverse Repurchase Arrangements

This Fund may not enter into securities lending and repurchase/reverse repurchase arrangements.

2. INVESTMENT RESTRICTIONS

The general investment restrictions as set out in the section of the Prospectus entitled **Investment Restrictions** shall apply to the Fund. In addition the Fund will not invest more than 10% of its Net Asset Value in other collective investment schemes.

3. **BORROWING AND LEVERAGE**

There will be no borrowing for investment purposes. In accordance with the general provisions set out in the Prospectus under the heading Borrowing and Leverage Powers, the Fund may borrow up to 10% of its total Net Asset Value for temporary purposes. The Fund's assets may be used as collateral or charged as security to secure borrowings.

4. **LISTING**

Please note that no Shares in the Fund are listed on Euronext Dublin or any other exchange.

5. **RISK FACTORS**

The general risk factors set out in the **Risk Factors** section of the Prospectus apply to the Fund.

AN INVESTMENT IN THE SHARES OF THE FUND IS SPECULATIVE AND INVOLVES A DEGREE OF RISK. ACCORDINGLY, PROSPECTIVE INVESTORS SHOULD CONSIDER THE FOLLOWING RISK FACTORS. THESE RISK FACTORS MAY NOT BE A COMPLETE LIST OF ALL RISK FACTORS ASSOCIATED WITH AN INVESTMENT IN THE FUND.

In addition, the following risk factors apply to the Fund.

General

There is no guarantee that the investment objective of the Fund, or its risk monitoring and diversification goals, will be achieved and results may vary substantially over time. Shareholders should recognise that investing in the Fund involves special considerations not typically associated with investing in other securities and that the asset allocation is not structured as a complete investment programme. Investments may be made in assets domiciled in jurisdictions outside the UK which do not have a regulatory regime which provides an equivalent level of shareholder protection to that provided under Irish or English law.

Nature of Investments

An investment in the Fund will require a long-term commitment, with no certainty of return. The Fund intends to make investments which the Investment Manager perceives as having the potential for substantial return, but which may also involve substantial risks. There can be no assurance that the Fund will be able to realise its investments in a timely manner. Since the Fund may only make a limited number of investments and since such investments may involve a high degree of risk, poor performance by such investments could severely affect the total return to investors.

Concentration Risk

While the Investment Manager will regularly monitor the concentration of the Fund's exposure to related risk, concentration in any one industry, region or country or with respect to any given counterparty or Investment Manager may arise from time to time. To the extent there is a downturn or other problem in any area where the Fund has concentration, this could reduce the return the Fund receives on its investments and, consequently, could have an adverse impact on the Fund's financial conditions and its ability to pay distributions.

Liquidity Risk

Certain securities may be difficult or impossible to sell at the time and the price that the seller would like. The seller may have to lower the price to effect a secondary market sale, sell other securities instead or forego an investment opportunity, any of which could have a negative effect on fund management or performance.

Market risk

The investments of the Fund are subject to normal market fluctuations and the risk inherent in investment in equity securities and similar instruments and there can be no assurances that appreciation will occur. Some of the recognised exchanges on which the Fund may invest may prove to be illiquid or highly volatile from time to time and this may affect the price at which the Fund may liquidate positions to meet repurchase requests or other funding requirements. Potential investors should also note that the securities of small capitalisation companies are less liquid and this may result in fluctuations in the price of the Shares of the Fund.

Potential Conflicts of Interest

In addition, investors should note that the annual Management Fees are based on the Net Asset Value of the Fund and the Investment Manager may value assets of the Fund in certain circumstances so there is the potential of conflict of interest and its fees will rise with an increase in the Net Asset Value of the Fund.

Foreign exchange/currency risk

Although Shares may be denominated in the base currency of the Fund, the Fund may invest its assets in securities denominated in a wide range of currencies. The Net Asset Value of the Fund as expressed in the base currency of the Fund will fluctuate in accordance with the changes in the foreign exchange rate between the base currency of the Fund and other currencies in which certain of the Fund's investments are denominated. The Fund may therefore be exposed to a foreign exchange/currency risk.

The Investment Manager will not enter into hedging transactions to protect against fluctuations in the relative values of the Fund's portfolio positions as a result of changes in currency exchange rates and market interest rates.

Equity risk

Equities as a class have historically outperformed other types of investments over the long term. Individual stock prices, however, tend to go up and down more dramatically over the short term. These price movements may result from factors affecting individual companies or industries, or the securities market as a whole.

Political Legal and/or Regulatory Risks

The value of the assets of the Company may be adversely affected by uncertainties, such as international political and economic developments, changes in market conditions, government policies or in legal, regulatory or taxation requirements.

Brexit

On 31 January 2020, the United Kingdom (UK) formally exited the European Union (EU) (Brexit). The Brexit withdrawal agreement allowed for a transitional period which subsequently ended on 31 December 2020. Ireland remains to be a member of the EU. The Company remains an EU regulated UCITS that can avail of passporting rights under the UCITS Regulations to market and sell shares in the Funds in the EU, subject to complying with the terms of the UCITS Regulations.

The Company submitted a notification under the UK's Temporary Permissions Regime to ensure that the Company continues to be recognised in the UK after the end of the transition period. UCITS funds are entitled to have non-EU investment managers. Accordingly, Majedie Asset Management Limited is in a position to continue to act as investment manager to the Company post-Brexit.

Due to the ongoing regulatory uncertainty as regards the terms of the UK's future relationship with the EU, the precise impact on the Company is difficult to determine. The Company may be negatively impacted by changes in law and tax treatment resulting from the UK's departure from the EU. No assurance can be given that such matters will not adversely affect the Company and/or the Investment Manager's ability to achieve the Company's investment objectives.

Settlement and Counterparty Risk

Settlement risk occurs when a transaction is not completed as duly agreed between the parties. This may be due to an error or omission in the necessary settlement, clearing or registration processes or due to the lack of creditworthiness of one of the parties to the transaction.

Counterparty risk occurs when a party to a contract fails to honour and defaults on its obligations thereunder. Funds which are party to these risks can incur considerable losses.

Availability of Suitable Investment Opportunities

The Fund will compete with other potential investors to acquire assets. Certain of the Fund's competitors may have greater financial and other resources and may have better access to suitable investment opportunities. There can be no assurance that the Fund will be able to locate and complete investments which satisfy the Fund's rate of return objectives or that the Fund will be able to invest fully its committed capital. If no suitable investments can be made then cash will be held by the Fund and this will reduce returns to shareholders. Whether or not suitable investment opportunities are available to the Fund, Shareholders will bear the cost of management fees and other Fund expenses.

In the event that the Fund is terminated or the Company is wound up, and to the extent that the assets may be realised, any such realisation may not be at full market value and will be subject to deductions for any expenses for the termination of the Fund or the liquidation of the Company.

Limited Number of Investments

The Fund anticipates that it will be diversified. However, in the event of a material demand for redemptions, the Fund could be forced to sell liquid positions resulting in an over-weighting in a small number of illiquid investments. In such circumstances, the aggregate return of the Fund may be substantially and adversely affected by the unfavourable performance of a single investment. The Fund's restriction of redemptions of Shares in excess of ten per cent of the total Net Asset Value of the Fund on any one Dealing Day will mitigate this risk to an extent should these circumstances arise.

Unidentified Portfolio

Because not all of the specific investments of the Fund have been identified, the Shareholders must rely on the ability of the Investment Manager to make appropriate investments for the Fund and to manage and dispose of such investments. While the Fund intends to make only carefully selected investments that meet the investment criteria of the Fund, the Investment Manager has complete discretion with respect to the selection of such investments.

No Market for Shares; Restrictions on Transferability; Limited Redemption Rights

There will be no secondary market for Shares of the Fund and transfers of Shares are only permitted to those persons who satisfy the criteria for permitted shareholders. Consequently, investors may be able to dispose of their Shares only by requiring the Fund to redeem their Shares at the next Dealing Day.

Exchange Rate Risk

Share Classes may be designated in a currency other than the Base Currency of the Fund. In such circumstances adverse exchange rate fluctuations between the Base Currency of the Fund and the currency in which the relevant Class of Shares is designated may result in a decrease in return and/or a loss of capital for Shareholders.

Payment of Charges and Expenses to Capital

The charges and expenses of the Fund may be charged to the capital of the Fund in circumstances where there is insufficient income being received by the Fund. In such circumstances, the capital value of a Shareholder's investment may be lowered and income may be achieved by forgoing the potential for future capital growth.

Net Asset Value & Valuation of Assets

The valuation of the Fund's assets obtained for the purpose of calculating Net Asset Value may not be reflected in the prices at which such assets are sold. For details of the valuation of assets, please see the section in the Prospectus headed **Valuation of Assets**.

BEFORE DETERMINING TO INVEST IN THE FUND, PROSPECTIVE INVESTORS SHOULD EVALUATE WHETHER THEY ACCEPT THE AFORESAID RISKS WHICH THEY WILL ASSUME BY BUYING SHARES OF THE FUND. THE FOREGOING LIST OF RISK FACTORS DOES NOT PURPORT TO BE A COMPLETE

EXPLANATION OF THE RISKS INVOLVED IN THIS OFFERING.

PROSPECTIVE INVESTORS SHOULD READ THE ENTIRE PROSPECTUS AND THIS SUPPLEMENT AND FULLY EVALUATE ALL OTHER INFORMATION THAT THEY DEEM TO BE NECESSARY BEFORE DETERMINING TO INVEST IN THE FUND. AN INVESTMENT IN THE FUND MAY NOT BE APPROPRIATE FOR ALL INVESTORS.

6. DIVIDEND POLICY

Dividends in respect of the Class Z Income (Sterling) Shares will be paid twice a year. It is anticipated that dividends will ordinarily be declared for the periods ending 30 June and 31 December from all net income in respect of the Class Z Income (Sterling) Shares of the Fund for the preceding period.

Dividends in respect of Class Z Income (Sterling) Shares will be paid in cash. Payment will be made by telegraphic transfer to an account in the name of the Shareholder within 2 months of the interim ex-dividend date (30 June) and the final ex-dividend date (31 December) of each year. Distributions not claimed within six years from their due date will lapse and will revert to assets of the Fund.

No dividends are payable in respect of Class A Accumulation (Sterling) Shares, Class Z Accumulation (Sterling) Shares or Class Z Accumulation (Euro) Shares of the Fund. The net income attributable to such Shares will be retained within the Fund and the Net Asset Value per Share shall be increased by the amount of net income earned.

The Fund has been approved by HM Revenue and Customs as a 'reporting fund' for UK taxation purposes. The Fund shall endeavour to satisfy the conditions in order to maintain reporting fund status unless the Directors determine otherwise. Although the Directors will endeavour to ensure that appropriate conditions for reporting fund status to apply are met, there can be no guarantee that they will be obtained or so met, or that once obtained or met, they will continue to be obtained or met for future accounting periods. Where an 'offshore fund' (such as the Fund) has been certified as a reporting fund for each accounting period during which a shareholder has held his interest in the offshore fund, any gain arising will be calculated and taxed as a capital gain, rather than as an offshore income gain, and such shareholder may be eligible for applicable capital gains exemptions and/or reliefs.

If the Directors propose to change the dividend policy of the Fund full details will be provided in an updated Supplement and all Shareholders will be notified in advance.

7. INVESTMENT MANAGER

Majedie Asset Management Limited is appointed as Investment Manager to provide discretionary investment management services to the Fund. Majedie Asset Management Limited is a manager approved by the UK Financial Conduct Authority. The Investment Manager is a UK domiciled asset manager. As of 31 March 2021, Majedie Asset Management Limited had approximately GBP 8 billion of assets under management and has extensive track record across all its investment strategies. Majedie Asset Management Limited is also the distributor of the Fund.
