Overview

Objective

The Company aims to invest primarily in UK securities with the long-term objective of achieving an increase of the Net Asset Value per share in excess of the growth in the FTSE All-Share Index and growth in dividends per share in excess of the rate of UK inflation.

Investment Process

The managers, supported by a collegiate team of 17 fund managers and analysts, construct a high conviction portfolio of c.40-50 holdings based on fundamental company research. Majedie's flexible investment process delivers a differentiated, diversified portfolio of listed equities. Investment decisions are stock-driven, and we consider ESG factors throughout. There are no in-built investment style biases. Instead, opportunities are sought across the market: 'growth', 'value' and 'recovery' stocks will all typically be held.

Portfolio Update

Several technology/on-line companies have floated on the London market this year. We participated in the June flotation of Made.com, as cornerstone investors. It operates a vertically integrated, online furniture retail proposition. It has a capital light business model, with a new and fresh emphasis across its ranges and categories. It has come to the market with an attractive valuation, particularly as we anticipate sales growth of approximately 30% per annum to the mid part of this decade. If management meet operational targets there should be attractive long-term upside to the shares.

Glossary

Base dividend per share: On 3 November 2020 the Directors of The Edinburgh Investment Trust plc announced their intention to declare dividends of 6.00 pence per share at each of the November, February, May and July stages, aggregating to a base dividend of 24.0 pence per share, for the current financial year to 31 March 2021. They also announced their intention to pay a special dividend of 4.65 pence per share in July 2021 for the financial year to 31 March 2021.

Base dividend yield: Base dividend per share divided by the share price (exclusive of special dividends).

Gross Gearing: This reflects the amount of gross borrowings in use by a company and takes no account of any cash balances. It is based on gross borrowings as a percentage of net assets.

Historic dividend per share: Dividends that have gone ex-dividend over the last 12 months (exclusive of special dividends).

Historic share price yield: Historic dividend per share divided by the share price (exclusive of special dividends).

Net Gearing: Net gearing reflects the amount of net borrowings invested, i.e. borrowings less cash and cash equivalents (including investments in money market funds). It is based on net borrowings as a percentage of net assets.

Ongoing Charges Ratio (OCR): This is an estimate of the ongoing administrative and investment management costs of operating the Company, expressed as a percentage of net asset value (debt at market value). The calculation incorporates charges allocated to capital in the financial statements as well as those allocated to revenue, but excludes non-recurring costs, transaction costs of investments, finance costs, taxation, and the costs of buying back or issuing shares.
